Mohammad Asem Rashed

FRONT-END WEB DEVELOPER

asemrashed002@gmail.com │ +880 1629998611

Linkedin │ Portfolio │ Github

PROFILE SUMMARY

Passionate web developer with a strong foundation in front-end development and basic backend knowledge. Skilled in modern web technologies and frameworks, ensuring seamless functionality and performance. Eager to apply technical skills and contribute to innovative web solutions.

TECHNICAL SKILLS

- **Front-End:** HTML5 | CSS3 | Tailwind | JavaScript | TypeScript | React.js | Bootstrap | Material UI | GeoCoding.
- **Back-End Basics:** Next.js | Node.js (HTTP, Modules) | Express.js (Routing, EJS Templating, Middleware) | MongoDB | Cloud Databases | RESTful APIs.
- **Tools & Others:** Git | GitHub | JSON | Security Practices (Helmet, Bcrypt & Passport).
- **Languages:** Bangla & English.

PROJECTS

Professional Portfolio   Live Demo   Github

Created a professional portfolio using React and Material UI to showcase projects and technical skills.

- **Key Features:** Fully responsive design for optimized performance on various devices, with an integrated contact form.
- **Tech Stack:** React, Material UI, and EmailJS for smooth communication with potential clients or employers.
- **Achievements:** Enhanced portfolio accessibility and responsiveness to improve user experience.

Restaurant Landing Page   Live Demo   Github

A responsive restaurant landing page showcasing the menu and ambiance, with review and reservation features.

- **Key Features:** A sleek restaurant website where users can explore the menu, read reviews, and book reservations effortlessly.
- **Tech Stack:** React and Material UI.
- **Achievements:** Created a responsive restaurant landing page with a pixel-perfect design.

Travel Bangladesh   Live Demo   Github

Developed a full-featured, dynamic website that showcases popular tourist spots in Bangladesh with a seamless user experience across devices.

- **Project Role:** Sole developer, handling all front-end, back-end, and security aspects.
- **Key Features:** Users can add, edit, or remove tourist spots; review locations added by others; and view locations directly on an interactive map.
- **Tech Stack:** JavaScript (45%), EJS (33%), CSS (22%) - emphasizing asynchronous handling, dynamic UI, and responsive design.
- **Achievements:** Successfully built and deployed a secure, responsive website to streamline user interaction with popular tourist locations.

EDUCATION

Diploma in Mechanical Engineering

National Polytechnic College
GPA 3.76

Web Development Bootcamp - *Udemy*

Completed hands-on projects focused on HTML, CSS, Bootstrap, JavaScript, React.js, Node.js, Express, and MongoDB.

CORE COMPETENCIES

Front-end developer with a strong foundation in creating responsive, interactive websites. Knowledgeable in backend basics, error handling, and database integration with MongoDB. Experienced in using Git for version control, ensuring clean and maintainable code across projects.
